

## **St Luke's Church, Goostrey**

### **Statement of Need for new Audio-Visual System**

We believe that this proposed AV installation will be a great enhancement to our worship, by providing flexibility of how services are delivered. It will also be used for holding courses and meetings, as well as village events, school activities and by visiting speakers. It will encourage us to appreciate and value the Church and assist in using the limited space we have to a greater extent.

We feel that school children will benefit as well as our younger families at All Age Worship services. YouTube clips, interviews and downloaded testimonies/stories will be used to enrich our parishioner's discipleship.

There will be a huge environmental benefit as it will greatly reduce the amount of printing of new hymns, songs, readings and notices.

Currently it will aid our worship whilst we are unable to sing during these Covid-19 times by enabling us to show clips of relevant music and choirs.

Grasping this opportunity and looking forward, it will be vital for the future of St Luke's Goostrey and the wider community.
